"This election is now a contest between Conservatives and the Alliance. There can be no hope of Labour winning".

At the Alliance's press conference earlier yesterday Mr Steel had maintained despite opinion polls showing support for the Alliance steady at 18 per cent, that tactical voting could change the position drastically by polling day.
People would realize that Labour "are not only incapable of forming a government, but are also incapable of forming an effective Opposition".

Mr Steel said that, after the disintegration of its campaign through disagreements on fundamentals in its manifesto, Labour seemed to be "out of the running". It was going downhill rapidly because of the "open warfare" which had broken out in its leadership.

Tomorrow the Alliance lead-ers will helicopter into Ettrick Bridge in the Borders to discuss detailed tactics. They have decided on the main strategy, to concentrate the attack on the Conservatives. They will go for the Tories on their record and the "lack of hope" in the present manifesto. Dr David Owen, the former Labour Foreign Secretary, said at the press conference that Labour was "clearly busted" and although they would continue to highlight Labour's shortcomings, "it is now necessary to focus our attention on Thatcherism."

Mr Steel said that despite the lack of movement in the opinion poll figures on Alliance support, he and other cam-paigners had detected a groundswell of new backing in the constituencies. He expected that to show in the polls over

TIMES

The damages, the highest ever awarded in the film piracy business, were ordered against Mr John Barnham of Tolworth, Cingston upon Thames, and Mr Neil Rivers, of West Drayton, Hillingdon, London.

They were ordered to pay a total of more than £4,360,000 to the film company wronged by their piracy of films such as E.T., Life of Brian, Alien, The Elephant Man and The Empire Strikes Back.

The sum, based on the film companies' loss as a result of nearly 60,000 blank cassets known to have been supplied to the organization the men worked with, could be followed by a further large award. Mr Justice Warner ordered

an inquiry into any further damage the film companies might have suffered as a result of other infringements of their copyright. "This award was the result of just one supply", a awver said.

But the film companies, all top American film makers, are unlikely to obtain their money. Neither of the two men is in a position to pay. The judge remarked to the companies' counsel: "I suppose you will now bankrupt them both".

The court action was brought by Universal City Studios, makers of E.T., on their own behalf and for other members of the Motion Picture Association of America, and for members of

Trade falls £180m into red

By Frances Williams **Economics Correspondent**

Britain's balance of payments on current account plunged into the red last month and new figures confirmed that the country has become a net importer of manufactured goods for the first time since the industrial revolution 200 years ago.

The figures released yesterday

by the Department of Trade are highly embarrassing to the Government in the run-up to the election. Opposition poli-ticians lost no time in claiming that they proved Mrs Thatcher conomic policies had failed. The balance of payments swung from a surplus of £565m in March to a £180m deficit las month. While exports sagged imports surged to record levels.

Over the past three months exports have risen by 3.5 per cent in value and 3.5 per cent in alue and 1.5 per cent in volume. But imports have jumped by much more - up by 8.5 per cent in value and 3.5 per cent in volume - as industry has begun to meet record consumer demand in the shops.

sucked in by Britain's tentative

Lord Cockfield, the Trade Secretary, insisted yesterday that exports were doing well, but admitted that higher imports of finished manufactured goods were "less welcome". He said: "This reflects industry's inability to meet rising

demand in this country". It presented a challenge to industry which must be met. Mr Giles Radice, Labour trade spokesman, said the "appalling" trade figures dis-proved Mrs Thatcher's "facile optimism" on recovery.

But the City shrugged off the bad figures. Sterling closed in London stronger on the day against all leading currencies.

At home in the country of Agatha Christie

First published in 1911, Small Country Houses of Today, edited by Lawrence Weaver (Antique Collectors' Club, £17.50) takes you straight to the heart of Agatha Christic Land. Or that is the immediate impression. These surely are the very residences of her prosperous and not very imaginative middle class - the Colonel, the Bank Manager, the Retired Indian Civil Servant, the Doctor, the Imaginary Invalid,

what Americans call a "men's room") for callers one wouldn't wish to admit to the rest of the house - just the place for seeing creditors, revenants and blackmailers. There is even a touch of Tony Perelli, Edgar Wallace's music-loving gangster in On the Spot, about the Birmingham specially designed to date an amateur or-

It is just as if a number of these capable are interest of these capables. architects, otherwise perfectly respectable, had got together to see which could produce at once the most trivial and the most self-assertive design.

Not for them the unpretentious but satisfying simplicity of, say, an early eighteenth-century farmhouse (roughly the same size as many of these particular Edwardian confections), agreeable even when taken from a pattern book, as most of them probably were.

The Industrial Revolution had intervened. Now it was Arts and Crafts time. The revolt against the machine-made was at its height, and it was to be some time before there arrived

Meanwhile there was a well-also used as a dining room meant but sentimental preoccu-pation with detail, with the superiority of objects made by staircases and fireplaces. There

> Emerging from Agatha Christic Land we come upon some real houses, and it is reassuring to find that Weaver, too, has his reservations. Medieval ideas are too remote from modern life to be a lasting inspiration, except in the proper use of materials: "We are moving in the direction of another eighteenth century". Sure enough, there are some excellently formal buildings, besides a spirited, idiosyncratic one by Lutyens.

> It may be observed that not all architects of the time had such complacent clients or were so fortunate in their builders. I know a large house in Buckinghamshire built in 1901 for a new and virtuous baronet. He was particularly fond of a certain hill, and caused the whole plan to be swung to the south-east in order that he might feast on the view.

The Edwardian purchaser seems to have had good value for his money. The house with the "man's room" mentioned above also contained three sitting rooms and five bedrooms and cost less than £2,000. A thatched cottage in Wales, which "though it has three sitting rooms of adequate size. yet it may rightly be called small, as it was designed for a lady with one servant, and has only four bedrooms", cost

At the price of the Lutyens house we can only guess. A handsome one at Wimbledon, practically a mansion, in 1903 cost £5,080. Compare these prices with the £56,000 that may be asked and obtained today for one of a row of 20-year-old hyperloss that segmed year-old bungalows that seemed to me expensive at their original prices of under £4,000. Yet in the 1930s money would oc-casionally go farther than before the First World War.

Early in the decade friends of mine, seeking to economize, sold their much-loved family home, but found instead a tolerable substitute in Norfolk. This consisted of a striking Georgian Gothic "cottage" with three or four sitting rooms. 10 bedrooms, stables and lodge, together with 20 acres of parkland for... £3,000. Of course it still required what we now call a "staff" of four to run it, so that opportunities to

As late as 1953, if you kept your eyes open, you could find almost unbelievable bargains. Thus an advertisement in *The* Times might (and did) lead to a beautiful and unspoilt early Georgian farmhouse containing three sitting rooms, four or five bedrooms and such delights as a spiral staircase to the attics, together with an acre and a half of land for £2,500. It was love at first sight with me, and I've

Soothing face of a savage thriller

Crime writing has two faces. Or rather backsides. There are the spreading hips of the cosy, and there are the lean buttocks of the hunter. An example of the Cosy is Puppet for A Corpse by Dorothy Simpson (Michael Joseph, £7.95), a whodunit in the fine tradition of the puzzle game, if with more of real human dilemmas in it than, say,

Yet a suspicion half-raises itself in my mind: is this combination of the tough and the sensitive a true fusion or is it simply a successful temporary combination like oil and vinegar in a dressing? Here is an egar in a dressing? Here is an example (a down-and-out is talking): "See that Sigmund Fraud? Ah coulda learned him about people". It's a good one. It says something about Glasgow (and, incidentally, it exemplifies McIlvanney's skill in transliterating the pesois) but in transliterating the patois) but isn't it a tiny bit of a fraud-itself? Or is it? Sometimes I think I detect a similar sleight-of-hand in Raymond Chandler, a faint falsity, a hint of poeticizing. But for most people Chandler works. On May 2 those wishing to visit public amenities, particu-larly the dozens of museums and galleries in London, on a wet Bank holiday found them shut. In letters to The Time readers asked why.

The simple answer is that the May Day Bank holiday has not sufficiently imprinted itself in the calendar, and that with many places normally closed on Mondays the administrators were doubtful whether there would be enough visitors to make opening worth while.

The extra cost of paying staff on the Bank holiday and the most staff wanted the day off. made it more difficult.

Did I miss the point, or did the story really end on an inscrutably mystrious note? For those who did not see it, it offered a housemaid's eye view offered a nousemand seye and of a tragedy involving an unhappy grande dame, her resentfully brutish husband, her nervously refined lover, and the ghost of her devoted ex-maid. I am reliably informed that the husband was the fly in the ointment, but the delicately poised images on the screen seemed to hint at subtler things.

No matter. This was a flawless piece of television, a perfect hour. Under John Glenister's assured direction the tired old paraphernalia of Upstairs, Downstairs and Roald Dahl pot-boilers came up looking fresh as new. Norma West and Joanna David led the

Don Giovanni Royal Opera House

Covent Garden's current Don ilovanni is a cumbersome affair, its heavy scenery obscuring the vital entrances on stage right up to and including the fatal arrival of the stone guest himself, Lumbered with such an unwieldy old partechnicon of a production, the house has wisely cast the present revival from vocal strength. There are no weak links in the new team and one or two very strong members indeed for Mozari's

dramma giocoso.
Samuel Ramey in the title role, for a start, in his first London appearance as Giovanni. Physically he is a little slight for the part, so he turns Giovanni into more of a gypsy tearaway — shoulder-length curly black locks, golden earring — than Spanish grandee. But the sense of the predator is there, the menace of the man who challenges all and gives a fig for nobody. Mr Ramey's bass-baritone has been growing in quality and power rapidly over the past few years, as a steady flow of opera sets testifies, and this Giovanni, lithe and dangerous, is conspicously well sung.

It has taken a long time for Stafford Dean's Leporello, familiar from Glyndebourne, Scottish Opera and any number of European houses, to reach Covent Garden. It arrives a

Miss Plowright has certainly burrowed her way inside this cold creature to portray an auburn neurotic whose chill and staid exterior scarcely conceals the passions bubbling beneath. And that is how Anna should be. Vocally, too, Miss Plowright was preity close to the part. Insufficient stamma or perhaps a lack of true top notes - the voice seems

much stronger at the bottom these days - prevented her doing full justice to "non mi dir", but this was an exciting portrayal. Kiri Te Kanawa has tempered the wild Elvira de-manded from her when the production was new, but in Mozart, as in Puccini earlier in

Falklands salvo

The events which the opinion polls suggest are giving the electorate the confidence to re-elect Margaret Thatcher continue to cause alarm and despondency in academic and diplomatic circles. In the latest issue of The Round Table. Sir Cyril Pickard, former High Commissioner in Pakistan and Nigeria, maintains that: "The Falklands crisis has undermined our confidence in the Government's capacity to follow a consistent national policy in our foreign relations." Sir Cyril argues that foreign policy has been subordinated to domestic political considerations: that after years of consistent ministerial rejection of a Fortress Falklands policy, that is now the policy to which the Government is committed; and doubts whether the policy can hold. "We sailed a few bomb fuses away from disaster in the Falklands," writes Sir Cyril. "In other fields risks of this magnitude could be the prelude not to Exocet but a nuclear holocaust."

Renaissance English, Manhattan flash

Last week the Prince and Princess of Wales opened the "Renaissance at Sutton Place" exhibition in the sixteenth century mansion near Guildford in Surrey. This was the triumphant culmination of a year's active promotion of this new cultural centre. Enthusiastic articles have appeared in almost every pressurement and electry measurement. newspaper and glossy magazine extolling the taste and munificence of Stanley J. Seeger, the American millionaire who has established and endowed the Sutton Place Heritage Frust. Rather less press coverage has been given to the recent public inquiry about unauthorized alterations to this listed historic building. This inquiry begs questions which have yet to be answered about the quality of and the motive behind the

The Sutton Place Heritage Trust was launched in June 1982, when a press release announced that Sutton Place "is experiencing a new renaissance that recaptures its fernal sance that recaptures its former sixteenth century glory as a centre of social and cultural influence. The glittering list of trustees includes Henry Moore, Sir Peter Scott and Dame Margot Fonteyn, and a programme of cultural events has been organized under the direction of the executive trustee, Roger Chubb, who formerly ran Sotheby's now defunct branch in Torquay. At the centre of the enterprise is Mr Seegar's own art collection, which has been installed

Sutton Place had been sold in 1980, four years after the death of J. Paul Getty, who had bought it from the Duke of Sutherland in 1959. The sum of £8m was paid for the house and its 1,000 acres by the Eagle Trust and Management Company, who bought it from Anglo-Texas property, formerly the Sutton Place Property Co. About 330 acres and the house were leased to Mr Seeger, who then established the Heritage Trust. Meanwhile another 68 acres were sold to Messrs Sainsbury for £6m to build a superstore outside Guildford and more land may be sold for housing, which suggests that the Sutton Place venture is not pure cultural phil-anthropy. Nor could it be, for huge sums have already been spent there. Most has been spent on the new landscape garden which is undoub-

tedly the most impressive and mos successful achievement at Sutton Place since 1980. This was designed by Sir Geoffrey Jellicoe, and is gardening on an eighteenth century scale unparalleled in twentieth century Britain. Huge amounts of earth have been moved to create a lake and, nearer the bouse, walls, hedges, urns and ponds have been disposed with wonderful ambition

and subtlety. A surrealist walk through a wood ends with an extraordinary wall by Ben Nicholson and there is a Miró pool. All of this enhances the character of the old

be said of the work carried out within Sutton Place itself. The house was built by Sir Richard Weston in the 1520s. The exterior is particularly beautiful because of the combination of weathered pink brick with the rare ornamental terracotta used for the windows. Because it was lived in by the recusant. Weston family for four centuries, Sutton Place remained remarkably unspoilt with, as in the most interesting houses, each century leaving a contribution. Naturally the present owner wished to leave his mark, but this seems to have involved eliminating much of the work of earlier occupants and has been done with markedly less sensitivity. In the great hall, panelling has been removed and a sixteenth century chimney piece replaced by another from elsewhere. Victorian heraldic stained glass has been taken from the staircase.

The Getty legacy is similarly belittled. The famous pay-telephones installed by that mean multi-millionaire have gone, although they would have be entertaining relic, and Mr Chubb pours scorn on the glass-fibre ceilings installed by Getty. These are, in fact, perfectly elegant, harmonious and convincing in style, which cannot be said for the selfconciously avant-garde redecora-tions carried out since 1980. Walls have been painted white while a seventeenth century starcase panel-ling has been decked out in pink. grey and blue. Not even the interior decorators employed by the National Trust have ever dared treat an historic house so cavalierly.

Sutton Place is, naturally, a listed historic building and alterations to listed buildings require planning permission. This, for certain works, the trust's architects neglected to secure. The recent public inquiry, which has yet to report, occurred because Woking District Council bravely challenged the painting and removal of panelling and the removal of the stained glass. The council also opposed the displacewindows to allow for a temporary fire escape. This was brave because they were faced by an intimidating phalanx of expert witnesses drawn from the trustees: Sir Roy Strong, Lord Norwich and Sir Hugh Casson. Sir Hugh's presence at the inquiry was not unexpected, for it is his firm, Casson, Conder & Partners,

that has carried out the alterations in

apparently valued at £25m. Loyd Grossman in Harpers & Queen

described this collection as "major" and "stunning in its breadth and quality." Others may possibly disagree. The odd Monet, Van Gogh, Bacon, Picasso and Hockney seems overwhelmed by a mass of 1950s contemporary instinct plants. 1950s contemporary painting plus an admixture of African and pre-Colombian tribal art. To sustain the impression that

Sutton Place is still a private house, many paintings are displayed in rooms with thick pile carpets and walls lined with tactile corduroy, The result is not a modern treatment which might complement an old English country house but something which recalls a New York apartment, recently done up and furnished by a fashionable interior decorator for prestige publication in the Architectural Digest.

This is all a matter of taste of course, but questions remain - apart from wondering what sort of person will pay £50 a ticket to come to this stockbroker belt answer to Glyndebourne. The first is: who is Stanley Sceeer? American millionaires recluses but Mr Seeger takes it further than most. His name does not appear in any of the standard American reference books and the BBC found that the file on him was missing from The New York Times records. Some reports say he is from Wisconsin. others from Texas. We presume the fortune comes from oil. Mr Seeger does not live at Sutton

Sixteenth century panelling, twentieth century decor.

trust, to live in one wing in, we presume, solitary grandeur, assisted by the staff of 60. It must be a wonderful job to have. We are left to assume that, for tax reasons, Mr Seeger has to spend most of his time on his yacht in the Mediterranean. Yet Mr Seeger has recently bought a flat in London in the building overlooking St James's Park designed by Sir Denys Lasdun and this is being done up by Patrick Gwynne, another vintage modernist.

Why did Mr Seeger set up the Sutton Place Heritage Trust in the first place and to what extent, and for how long, is he prepared to subsidise what is evidently a nonprofit making enterprise? And what is the financial connexion between the trust, Mr Seeger and the company which bought the whole Sutton Place estate in 1980? All these questions were asked at the opening press conference last year and secured no direct answers.

Perhaps such cynical questions are out of place. Sutton Place has found a new use which is not a drain on public funds; the landscape and grounds are beautiful and the events there will give pleasure to those who can afford them. For the very rich to secure social prestige through art and munificence is an old, honourable and valuable practice, while in the US, thanks to advantageous tax laws, cultural ventures like the Sutton Place Heritage Trust are common; but it is somewhat rum to find such an expensive and confident combination of old and new in modern England.

Fair winds for Williamsburg

Intrusion into private grief is property deplored and commen-taries on public humiliation - I speak from small experience - are not much

less de trop. And Michael Foot is, by common consent, the most civilized, cultivated, kindly and amusing boss the Labour Party has had in years. Moreover the calamities at present afflicting his campaign are in large part the legacy of the way his party had been run by his two immediate predecessors. Yet one of them cannot miss a chance to drop another pot of paint on his successor's head. Michael Foot must be sorely tempted to repeat to Jim Callaghan Hilaire Belloc's advice to

Lord Lundy's grandsire's buder, who was cautioned "not to play the old retainer night and day".

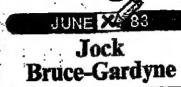

Politicians in a general election campaign live in dread of thunderbolts. The Tories back in 1964 thought that they were sunk by the revelation of an £800m balance of payments deficit (which needless to say was largely revised away by subsequent recalculations). Harold Wilson blamed his fall in 1970 on a bunch of bought-in jumbo jets which queered the trade returns in mid-campaign. In February 1974 the hapless Campbell Adamson, then Director-General of the CBI was supposed to have blown the election for Ted Heath by an off-the-cuff complaint about the Industrial Relations Act of 1971.

In retrospect it seems wildly improbable that any of these unexpected pratialls made much difference to the outcome of the campaigns in which they featured. And so, I suspect, it is this time.

True, neither Alec Douglas-Home in
1964, nor Harold Wilson in 1970,
nor Ted Heath in 1974 had to undergo the experience of having his principal party organizer announce in mid-campaign that his campaign committee had just identified him as party leader. But two days before Jim Mortimer's obliging clarifi-cation – and 24 hours before Sunny Jim saw fit to put the boot in - I was told a woeful tale of Labour canvassers in a solid north London constituency having doors slammed in their faces with the cry, "You're nothing but a bunch of Commies!"

What has been rather special about Labour's predicament is that it is entirely of their own devising. Over defence, as over so many other aspects of their policy, they tried to build a bridge of verbiage, in this case between the scrap-all neutralism of their national executive and the reluctance of Denis Healey to face the charge of planning to go "naked into the conference chamb-

Not, of course, that Healey wa worried about the possibility of baving to eat his words were he ever to reach the Foreign Office - his digestion is made of sterner stuff than that. His worry

average shopfloor voters would be turned off in droves. When those fears proved amply justified as soon as canvassing began, then naturally he tried to rewrite the manifesto only to come up against the awkward fact that his leader is a unilateralist who genuinely believes

I know the feeling. In October 1974 I was met, at doorstep after "We're not wanting back to a three-day week." In desperation I signalled headquarters for an unambiguous statement that a Tory government would not embark upon another kamikaze battle with the unions. It was not forthcoming, since that was not at all how the events of early 1974 were seen on high. Come polling day my majority

vanished down the plughole.

So who is to be the beneficiary of this everyday story of militant folk? this everyday story of militant folk?
By rights it ought to be the Social
Democrats. Shirley Williams claims
she knows it is. Judging by the
opinion polls she's whistling in the
dark. There is no sign as yet of liftoff for the Jenkins heavier-than-air

The trouble with the "Alliance" is not, I suspect, as we are often told, that they have no policies - they have plenty. Their trouble is those policies seem so out of date as to be virtually irrelevant. They hanker for a return to the heyday of Butskellism. Mrs Thatcher's message, throughout her first premiership, has been that that was tried and tried and ultimately found wanting and she has won that

argument.
So she departs for Williamsburg with the opposing troops at home apparently in terminal disarray. Her electoral prospects could carry one clear message to her parmers, and first and foremost to her host; and it would be vastly to the advantage of all of us that they should.

The message is this. If Britain today is better placed than almost any other participant at the summit to enjoy a period of both sustainable recovery and more stable prices - as we are - then that is very largely because in 1981 Geoffrey Howe was brave enough to cut his Budget deficit even at the cost of raising

If that is the message that comes through at Williamsburg, the Prime Minister could be forgiven for repeating - more or less - the claim of William Pitt the Younger: that Britain, having saved berself by her exertions, will save the West by her

Sorry, Hector, you must stay inside

Zob tried yet again to murder the penguin in the next cage with his long beak, and laughed diabolically. long beak, and laughed diabolically. Despite my marathon sponsorship, making him the richest raven in England, he is still displaying the psychopathic traits which had him banished from the Tower of London, where he had happily waged war on American tourists. Perhaps you should get him a psychiatrist to put him back on the straight and narrow", suggested a friend. Hector doubled up and nearly fell off his perch.

But it was an idea, with possibilities. Like former public enemies Jimmy Boyle and John McVicar, a reformed Hector might one day hop free through the gates of Regent's Park and become the subject of a Channel 4 documentary. The new darling of Hampstead intellectuals, he would probably get his own column in a left-wing magazine and dine on steak tartare in the Gay Hussar with former Labour minis-

So I decided to sound out my old tutor. Dr Uli Weidmann, a dis-tinguished animal behaviourist who now teaches at the University of Leicester's psychology department; the very place that used to mark McVicar's social science essays when he was incarcerated. Hector's problem, thought Uli, could be

sexual.
"He will be more aggressive at this time of year because of the male hormone flooding the bloodstream", he said. But, according to his keeper, all Hector ever does is talk to his girl friend Doris and nothing else. "Even if he does not actually mate he will still be territorial if people try to interfere with him," added Uh. It seems I have a sexually repressed

raven on my hands. "One of my students is doing a thesis at the moment which shows that it is not the strongest mallard drake which gets the mate, it is the most beautiful. The female rates the male on beauty," said Dr Weid-mann. Perhaps Hector should improve his appearance with a bow tie. Ravens have always been

conservative dressers. "Hand-reared birds like Hector tend to have no fear, and if they get angry they might attack. A wild bird does not do that: It is very unusual for a wild bird to get vicious," added Dr Weidmann who, though he has calmed many a deviant duck, could not offer much home.

Hector the talking raven of London not a curious request", he said. "We had a phone call the other day from a chap worried that his kestrel had changed sex. We were able to reassure him. Personally I think Dr Russell Coope of Birmingham University is your man, he's a bit of a specialist with these birds of prey.

But Dr Coope said: "From what I have heard about Hector he sounds to be incorrigible. Once they have a personality trait like this built in they will never be trustworthy. I should keep well away. You can't hit a bird with a rolled-up newspaper as you would a dog."

Anyone trying to hit Hector with a copy of *The Times* would become

a grim statistic in the next day's paper. Even a broom, his keepers say, is not good protection. "If you were to punish a raven he

would just become more cunning," said Dr Coope. "They are highly intelligent and like to see that their antics are getting a response. I had a jay once who found that if he flew after people they would wave their arms about. If they didn't panic and run away he got bored and left them

Ravens have great memories. In Hector's case he might have been injured or insulted in some way, and he would remember an injury or insult. They are the brightest of birds, more intelligent than parrots, and love to tease people.

A raven I knew made a pouch in a perch bound round with sacking and used to take money from people and put it in the pouch. A few like Hector do develop bad habits; one raven I saw used to hammer at ladies painted toenails when it was fashionable to have shoes with open

But these are the exception." Dr Coope emphasized. "Rayens have had a bad press through the ages, being regarded as birds of ill omen. The best way to see them is in the wild doing acrobatics. They are one of the few birds to turn upside down just for the joy of it.

"Unfortunately Hector is one of the exceptions and should remain in protective custody."

But when I went to see Hector to tell him that he faced a lot more "bird" he just cocked his head on one side like Jack Nicholson in One angry they might attack. A wild bird does not do that it is very innusual for a wild bird to get vicious," added Dr Weidmann who, though he has calmed many a deviant duck, could not offer much hope.

At the Hawk Trust, which is also interested in other birds of prey, Mr John Richman sympathized. "It is

Did Bernard Levin let Wilson in?

Mike Randall, former editor of the Daily Mail, recalls the column that may have tipped the balance in the 1964 election

It was a few days after the general election of 1964 that I discovered that it is possible to be summarily dismissed and yet retain your job. I was editing the Daily Mail, then under the ownership of the late Lord Rothermere and, as now, solidly on the right in all its opinions. But I was trying to nudge if not steer, it was trying to nudge, if not steer, it stealthily towards the centre.

Four months before the election I had agreed with Bernard Levin that he should have a column in the Mail five days a week. It was, of course rather shorter than the pieces that now entertain readers of The Times but it was none the less effective.

Believing that we knew our Rothermere, who was always reluc-tant to be committed and whose opinions of his newspaper some-times varied by the day, if not the hour, Bernard and I prepared the ground well. I explained carefully to my proprietor what was contem-plated and why it would be good for the Mail to have a column that would, on occasion, take a view of life unfamiliar to regular readers of our leading article which, in those days, appeared in the first column of the front page.

Bernard wrote four or five specimen columns for Rothermere who agreed, verbally, that we could inflict him on our readers. As was his cautious custom, Rothermere put nothing in writing but Bernard drew up a contract the like of which has probably not been seen in Fleet Street. Here is clause nine:

"Should any article be in its tenor or views contrary to the known and declared policy of the Daily Mail, this shall not in iself constitute a reason for its not being published, though the Daily Mail shall at all times be free to indicate, in an appropriate manner, that the views expressed by Bernard Levin are his, and are not necessarily or in fact those of the Daily Mail. None the less the editor shall have the right to

reject any article in its entirety. It reject any article in its entirety. It is, however, agreed that this right shall never be exercised capriciously or unreasonably, and its possible exercise will in every such case (if any) be discussed first with Bernard Levin, provided the latter is both available and sober; in which connexion Associated Newspapers shall make every effort to set in touch make every effort to get in touch with him and he shall make every effort to become sober if he is

On June 29, 1964, the first Levin column appeared, with this opening paragraph: "These have been vintage days for students of lunacy. In Southern Rhodesia an African demonstrator who threw stones at a police dog was promptly shot dead, thus indicating that someone had taken rather too literally Madame Roland's celebrated dictum: The more I see of men, the more I admire dogs'."

Students of the fantastic were also about to gather vintage material.
Came the general election and
Bernard asked if he could write four
consecutive columns, the first three
to be examinations of Tory, Labour and Liberal policies and persona-lities, the fourth to be published on polling morning and to be a personal explanation of why Bernard Levin would vote Tory/Labour/Liberal.

On the morning of Thursday,

October 15, Bernard duly explained why he would, albeit reluctantly, vote Labour. He did so in a manner more convincing and in prose more eloquent than the Daily Mail could muster for its customary "Vote Tory" column on the front page.

What was said at Daylesford, Lord Rothermere's Cotswolds home, when he heard the news that Harold Wilson was in with a threeseat majority I have not yet discovered, but his reaction was immediate and drastic.

It was the custom that anyone visiting Rothermere for the weekend should report to his London secretary and collect whatever letters, publications or packages were awaited at Daylesford. That post-election weekend, Bob Hammond, then managing director of Associated Newspapers, spotted among the envelopes one, as he told me later, with familiar handwriting. He did not read to whom it was addressed but thought it must be important and placed it on top of

Arriving at Daylesford before hunch on the Saturday and finding, not unusually, that his host was out with the dogs, Hammond dumped his deliveries on a sitting room table and waited. When Rothermere returned and poured the drinks, Hammond said: "T've brought your letters from London. The one on the top of the pile looks important."

picked up the envelope, looked at it and strode back to Hammond saying "This is for you," and left the

Hammond opened the letter which was, indeed, addressed to him in Rothermere's handwriting. It

The letter said: Dear H.

For the first time in the history of Associated Newspapers a member of the editorial staff has given his political opinions in the columns of the Daily Mail without the consent or even the knowledge of the proprietor: Such an event is intolerable and demands the resignation of everyone concerned in the matter. I would remind you that when I saw the editor of the Daily Mall in the Board room in your presence I told him that the Daily Mail had to support the Tories not only in the leading article but also throughout the newspaper. My instructions have been flouted and I am not prepared to tolerate such action.

Yours sincerely,

By the time Hammond had digested the letter and decided on a policy of silence, Rothermere returned and the two sat down to lunch. No mention of the letter was made during the meal. Nor was the matter raised until the next evening. shortly before Hammond was due to drive back to London. As he was about to take his leave he said to Rothermere: "That letter. Shall I deal with it in my way?" "Yes," said Rothermere – and that was all he said. Hammond's way was to send for me and tell me not to do it again. We can only guess at Rother-mere's motive for the letter. His instructions had not included, and could not include, a columnist who had the right to express his own opinions. Possibly somebody had convinced Rothermere that, but for Bernard Levin and the Mail, Harold Wilson would not have scraped through to No 10. Surviving the incident, I felt more secure in the editorial chair. How

wrong I was is another story. The author was editor of the Daily Mail 1963-66.

of spectacle recently presented to prevents universities barely M Alain Savary, the reforming education minister in the Mitterrand government. There is in our As generations of well-educated institutions of higher education. ("unrivalled" is the qualifying adjective in the Conservative Party's manifesto) a solidity among both staff and students that will always deflect the passions which produced the latest events in Paris and provincial French cities. Yet a concomitant of British academic quietude is a disappointing passivism: why have not dons and students been more angry as, over the past three years, both government and University Grants Committee have pursued a policy of not entirely justifiable cuts in spending and student

There has been a stoic acceptance of higher education policy as given by ministers and a Department of Education and Science whose senior men are still by no means convinced that all the academic "fat" has been stripped away. This attitude goes hand in hand with a dismaying conservatism - for example, about the shape of degree courses, the length of long vacations, the amateurism of academic management - shared by staff, students and the employers who give them jobs on the strength of their degrees.

Aspects of the universities' conservatism are of course valuable: They exist in part to conserve and transmit knowledge. It is to their credit that during the period of great expansion after Lord Robbins's report they were able to sustain high standards and pass them to the newly-created institutions.

But in another sense they were too conservative, expanding without breaking from the old framework of three-year honours degrees, fully grant-aided students, unmethodical research.

No British Secretary of State unrestricted tenure and expenseuld conceivably face the kind ive autarchy - which still miles apart from cooperating over libraries and joint courses. Scots will testify there is no God-given virtue in highly-specialized three-year honours degrees.

> On the campuses there is all too evident an attitude akin to that of the ninth-century clerics who withdrew to the monasteries to keep the flames of scholarship alight during the dark ages - as now symbolized by spending cuts and an unsympathetic government. In fact responsible ministers, Sir Keith Joseph himself, and Mr William Waldegrave, have indicated that after the financial turmoil there must now be a period of stability; the Prime Minister, an enthusiast for scientific research, might yet be prevailed on to agree that the nation's research and development capacity depends on the general health of the universities and polytechnics. But the corollary of some stability in university financing must not be stasis but change in tenure arrangements, in retirements, in faculty organization, in the division between teaching and research, in the inflow of "new blood" in the disciplines.

> What is needed is not some rewrite of Lord Robbins's report of twenty years ago, but a sequence of experiments - what university will have the courage to respond to Sir Keith's recent imaginative proposal for an experiment in university budgeting? The great merit of the final report of the Leverhulme programme of study into the future of higher education, published yesterday lies in its tentativeness. It proposes certain changes in the rules of. the game (for example on tenure where it wisely says the existing employment protection rules would form a strong barrier against intellectual persecution) and invites response to a set of

From Lord Harris of High Cross proposals, to be adopted in part or by individual institutions.

This is altogether a praiseworthy effort, paid for by Leverhulme money and conducted by Professor Gareth Williams of Lancaster University with commendable awareness of the boundary between higher education and the economy. The contribution of such men as Sir Adrian Cadbury is worthwhile for its own sake and also to scotch any suggestion that corporate Britain can afford not to

care about what goes on in the

Leverhulme's suggestions are many, and will repay study by the new men coming in at the head of the UGC and the DES as well as those ministers taking up their seals after June 10th. The headlines have been captured by the proposal for a two-year degree course plus a two-year limit on student grants, but as important are the report's emphases on professionalizing ing budgets for teaching and

university management, separatresearch and creating some academic body external to the universities to monitor standards and academic competence. The latter proposal has a bureau-cratic ring about it, but must appeal to anyone who has ever picked up the compendium of research in the social sciences.

The Leverhulme report rejoices in the diversity of universities and colleges and even in the sometimes uncomfortable overlap between the universities and the polytechnics. It is thus no document for a British Alain Savary (next Thursday looks unlikely to produce any candidate for the role). It speaks instead to those academics who might be tempted to retreat into their specialisms for the duration: its remedy for excessive specialization by undergraduates deserves consideration by all who are concerned by the course of economic life for the rest of this decade and into the 1990s.

NOBODY'S KURDS

Turkish authorities have drawn attention to a problem which they usually like to keep as far. out of the limelight as possible to the point sometimes of Iraqi side of the border. denving its existence. On Tuesday the mass trial of 574 Kurdish separtists, which had been going on in Diyarbakir for two years and a month, concluded with thirty-five death sentences, twenty-eight life sentences (ten of them commuted to a mere twenty-four years because those convicted were minors at the time of the crime), 333 other prison sentences ranging from three to thirty-six years, and 178 acquittals. On Thursday, in a move also clearly directed against Kurdish militants, two brigades of Turkish troops pen-etrated about twenty miles into

Iraqi territory. There may be no direct connexion between the two events. The militants condemned in Diyarbakir belonged to the Kurdish Workers' Party (PKK), a group seeking to set up an independent Kurdish state in what is now eastern Turkey. Those who were pursued into iraq could also be Turkish citizens but could equally well be members of one or other of the Iraqi Kurdish groups who are fighting for autonomy against the Baghdad regime, but often also fighting each other. Such inter-Kurdish fights have been known to spill over into Turkey

By two actions this week the that, epecially when, as happened on May 10, three Turkish soldiers were killed and three wounded by gunmen, believed to have been Kurds firing from the

> Why would Iraqi Kurds be firing on Turkish soldiers? Without more information it is impossible to say. They could have been involved in arms smuggling, or just about any other sort of smuggling, and the soldiers might have been pursuing them across the frontier. Alternatively they might have been pursuing their local enem-ies across the frontier and the Turkish troops might have got in the crossfire. Or they might not have been Iraci Kurds at all, but Turkish Kurds trying to take refuge in Iraq.

> Whatever the background, the use of Turkish troops on such a scale in cross-border operations must be embarrassing for the Iraqi government. At very least it draws attention to the inability of that government to assert its own authority in the mountainous regions of Iraqi Kurdistan. At worst, it will reawaken old irredentist passions on the Turkish side, and corresponding fears on the Iraqi side, with a mixture of hopes and fears

among the Knrds. Neither Turks nor Kurds have forgotten, or ever fully accepted, the incorporation into Iraq of the Ottoman province of Mosul, before. The Turkish government whose population was predomi-understandably does not like nantly Kurdish with a large

Turkish-speaking minority, by an act of British imperial power. The Turks argue that under the terms of their National Pact it should have been part of Turkey.

Last year an article in the New Statesman, alleging the existence of a Turco-American plot to seize northern Iraq, aroused great interest and anxiety in the Arab world. Such a notion seems extremely far-fetched, given the amicable cooperation existing between the Turkish and Iraqi governments, and it is most unlikely that what happened this week has anything to do with such a plan. But it does remind us that some hitherto unthinkable things might become thinkable in the event of a complete collapse of central government in Iraq.

A reunited Kurdistan certainly comes into the category of the unthinkable for the moment, and an independent one even more so. In Turkey the authorities have set their face not only against independence but against any form of autonomy and even against the Kurdish language, the use of which in public has become a finable offence. To discourage separatism is one thing. To deny the national aspiration of eight million people is another. It can be done for a time by force so long as the population is backward, ignorant and tribal. It cannot be done indefinitely in a country which aspires to be seen as a European democracy.

UNDERCOVER: OVERDONE

Mr Willaim Casey, director of from the Atlantic coast and Eden the Central Intelligence Agency, and Mr Thomas Enders Assistant Secretary State for Inter-American affairs, have been well-co-ordinated pincer movereported as having told Con-gressional committees in secret ment may not be universally hearing that there was a prospect that anti-Sandinista "contras". with "covert" US support, might overthrow the Nicaraguan sovernment before the end of the year. The previously stated aim of this part of United States policy was to interrupt the flow of arms from Nicaragua to El Salvador though its effectiveness to that end is doubtful. Congress was assured that it was not designed to bring down the Nicaraguan government or to cause a war between Nicaragua and Honduras. Despite later denials, it now appears that the earlier limited ambitions are giving way to higher stakes in a more dangerous game. This provokes both

scepticism and alarm. Do such operations have 2 chance of overthrowing the Sandinistas? A combination of Honduras of Miskito Indians ports. It will weaken Nato by

Many of its members and supporters fought Somosa. And though not entirely isolated, they are by no means wholly reliant on Cuba, let alone the Soviet Union, to come to their material aid. A quick victory against them does not look probable.

The result of escalating harrassment, leading to invasion look more like being these: a radicalisation of the Sandinista government, a greatly increased risk of regional war in Central America, starting with a conflict between Nicaragua and Honduras but not stopping there, and no swift end to death and destruction in El Salvador or in Nicaragua itself. strengthening anti-American feeling in Europe, and provide fine propaganda for the Soviet Union. It is unlikely to produce a "stable" central America of viable client states, and may therefore involve the United States in prolonged and costly distractions in a region where its genuine strategic interests could be better protected by other lines of policy.

The United States deployed 200 ships to blockade Cuba in 1962, it would be better now not to raise the stakes as it was then, but to limit the damage before that stage is reached. One of the difficulties about achieving a reduction in tension is that much of the American debate about Central America is now not so much about Central America, but more about the domestic party struggle and considerations of global prestige in the context of the East-West argument.

Nobody wants to send combat troops, a consensus that makes current policy the more under-hand. The Administration appears to seek total victory using a variety of surrogates and diplomatically going it alone. Failing that, it wishes to put the blame on Congress. It is unlikely to succeed with either aim.

LETTERS TO THE EDITOR

Economic agenda for Williamsburg

High wages and unemployment

Sir, Mr Peter Shore looked unusually pleased with himself on television for proving that high wages could have nothing to do with unemploy-ment. His "proof" was to say that if low wages helped then African and Asian workers would be fully employed.

But even the most shadowy of shadow chancellors should be able to grasp that wage comparisons can be sensibly made only in terms of cost per unit of output. If trade unions had not spent decades keeping output down, British wages could be higher without pricing our workers out of employment.

Anyway, how does Mr Shore square his view with the Labour manifesto which promises "employment subsidies to firms linked to agreements with them to preserve and create jobs." Why would employers be needing subsidies if labour costs per unit of output were not too high?

The unbearable truth is that almost everything British trade union leaders have done has helped to inflate labour costs and so to depress employment prospects. Having spent half their time restricting efficiency, they have devoted the other half to forcing up labour costs. This they have done directly through unrealistic wage demands, and indirectly by pressing for socialist policies that have burdened employers with non-wage costs, including rates, taxes and other costs of complying with multiplying statutory obligations.
Having willed the means, they

cannot now escape blame for the resulting unemployment. Since the Low Pay Unit is no more than a trade union front, we should not be surprised it is playing the same game. But so long as it insists on trying to price more workers out of jobs, we should think of it as the No Pay Unit.

Yours faithfully. RALPH HARRIS, General Director, Institute of Economic Affairs, 2 Lord North Street, Westminster, SW1. May 25.

A change of tune From Mr Martin Knapp

Sir, Can there be anything more incongruous than the singing of "Abide with me" before a Cup Final? There must be many for whom the words of this splendid hymn bring a very special message of comfort and strengthened faith. They must find it almost blasphemous that what is part of their religious experience immediately precedes the bawling of a football crowd and has become an integral part of the annual ritual.

The singers, I suspect, are happy schmaltz. Might not one of the more popular sentimental Victorian bal-lads be just as effective, just as relevant and run no risk of offending those who regard the verses of H. F. Lyte with some degree of reverence? Yours sincerely. MARTIN KNAPP.

Liberal food policy

From Mr W. A. N. Jones Sir. Mr David Steel is certainly right to raise the question of the cost of the British shopping basket but he is unlikely to reduce the cost of food to the British consumer. The Liberal Party, regrettably, has abandoned its historic commitment to the principle that taxes should not be levied

on food imported into Britain. Under the Common Agricultural Policy of the EEC heavy import duties are levied on many foodstuffs and the importation of some foods is virtually prohibited (cheese from New Zealand, for example). The EEC levy on wheat imports doubles the price of the wheat consumed in Britain. We are back in the old days of the pre-Cobden corn laws with a

The CAP is a major factor in forcing up the cost of living to consumers everywhere in Britain and the EEC. It greatly reduces our ability to produce goods at competitive prices. It is a direct cause of much of the present high unemploy-ment. It is a major handicap to any British government trying to solve the problems of the 1980s. Yours faithfully,

NEWTON JONES, Chairman, W. H. Jones and Co (London) Ltd, Tower House, 17 Oakleigh Park North, Whetstone, N20.

Reporting Lebanon war From Mr Gai Eaton

Sir, You have come in for some flak on account of your recent leader ("Friends beyond the need," (May 19)) and, with becoming modesty, seem to have refrained from publishing the letters of approval which you must surely have received. The voice of British Jewry had been heard, loud and clear, but I believe it is time to take to note of the fact that there are between three and four times as many Muslims in

this country as there are Jews. The Muslims are no less sensitive to criticism and certainly feel no less strongly on this issue. If their views seldom find expression in your correspondence columns this is, I suspect, largely due to the fact that they have not yet learned to express their anger in the urbane and superficially "moderate" tone

required.
Nevertheless, Muslims and Jews have to live together in this country, and the anger and sense of injustice which I see building up in the Muslim community on account of the over-representative of Jewish opinion in the press does not angur well for the future. Calke Abbey's future

From Mr A. M. Alexander Sir, I have read with interest your

artiicle (May 23) in relation to the difficulties surrounding the offer to the Nation of Calke Abbey which you have published under the headline "Funds threat to historic homes".

Being involved in the negotiations with the various government departments in connexion with this offer I am bound to say that the difficulties which may emerge seem to be, not so much the availability of public funds to enable this property to be handed over to the nation, but the question of the actual will of the Government to have the property taken into public ownership. As your reporter made clear, Calke Abbey, its contents and sufficient agricultural land to provide an adequate endowment fund were

offered by the trustees in lien of tax. The Government indicated that whilst it would be prepared to accept the Abbey and its contents in lieu of tax, they could not accept the endowment fund. This despite the fact that, but for technical reasons because the property is held in trust, the deceased both before and after his death could have put the endowment fund into a maintenance fund - which has been actively encouraged by successive governments since 1976 - and achieved total tax exemption on his death. Effectively, therefore, by accept-

funds to support it, the Government is showing a quite different face when dealing with the actual heritage situation, from when dealing with the academic principles, where lip-service is paid to the importance of preservation of the heritage. This is not a case when the

Government is being asked to expend funds of its own, but a case where the owner of this important house and its contents is asking to settle his bills to the Nation, by handing over the house and an endowment fund to keep it, in lieu of tax. This from a desire to preserve our heritage, which it was confi-dently believed was the like aim of the Government Unless there is a change of heart,

the result in this particular case, and no doubt in others in the future, must be the break up of collections of particular importance in the context of our history, and the export of our greatest treasures.

If the Government is really serious about its wish to preserve the heritage, with Calke Abbey they have an opportunity, at no cost to themselves, to give a token of good faith of their intentions. Yours faithfully,

A brother's death

From Lady Willoughby de Eresby Sir, May I seek the hospitality of your columns to deal with a matter of private concern but also, your readers may agree, of some public COBCETIL

On the night of Monday, August 19, 1963 my brother Timothy, aged 27, drowned in the Mediterranean. He and a friend had planned to cross from Cap d'Antibes to Calvi by moonlight and they arrived in the South of France on the 18th. The Mistral which was blowing subsided and, ignoring repeated warnings that it could recommence, they left on the evening of the 19th in a small Chriscraft quite unsuited to rough seas and were never seen or heard of

The violence of the storm that night destroyed a number of boats anchored off the coast, drowning their occupants. An air and sea search was mounted by both the French and Italian police but no

trace was ever found. Our doctor kindly joined me in the search and wrote a detailed report of the investigation.

. My brother's death devastated my parents who never fully recovered from it. During their remaining years great distress was caused by the continuing and baseless speculation in sections of the press that my brother was still alive; but as he was in fact dead no legal action could be taken.

The most recent article appeared within two days of my father's burial in April and its contents dishonoured his memory as well as my brother's. I hope that this simple statement of the facts will dispose of further speculation or rumour and allow my brother to rest in peace.

Yours faithfully, JANEWILLOUGHBY de ERESBY. Grimsthorpe, Bourne, Lincolnshire, May 23.

Manifestos and electoral law

From Mr Charles Rowlatt Sir, A paradox has emerged in this election. The undecided voters want to read the Party manifestos, but are

obstructed by the electoral laws.

These booklets cost a significant sum to produce. Lawyers advise that if distributed by constituency par-ties, their value should be included in the election expenses of the local candidate. These expenses are limited by statute to a level that would allow only one manifesto for every seven voters (at a unit cost of 50p in a metropolitan constituency of 60,000) and no other campaign expense would be allowed. There could be no posters, no pamphlets, no halls. In effect, candidates are prevented from presenting their

detailed platform to the electorate. Central parties, with no limit to their expenses, are reduced to selling the manifesto direct to voters, or resorting to the vagaries of commermassive resources, and the second is prone to bias.

Yours faithfully. CHARLES ROWLATT. 10 Hampstead Hill Gardens, NW3. May 25.

Sandals, swimming togs and suntan lotion may be enough for some. Not for Philip Howard, for whom only a good book can relieve the boredom of the beach. But how to choose it? Can P. G. Wodehouse singlehandedly combat the tedious

terrors of Torremolinos? Herewith some tips for trendies, hints for hedonists, wrinkles for workmen, and simple thoughts for intellectuals

How to book a holiday

have become a national institution, a national right, and almost a national religion, we expect too much of them. We start planning them in January. gloating over the polystyrene prose in the travel supplements. The annual expedition to Corfu or Devon, or Benidorm, is going to change everything, bring new romance and zing into our lives, make us new people. In fact what it usually does is give us sunburn. heartburn, hangover, taedium vitae, and some blurred snapshots of bodies on a beach as proof to somebody (ourselves?) that we really had a smashing time on holiday. (Parenthesis: somebody ought to write a monograph on the lunacy of holiday photography. If it is pretty pictures that you want, the highly coloured local postcards are always better. But what we want is pictures of ourselves to prove that we have passage to nowhere successfully

This is not a new thought, though the zeal for holidays is more fanatical than it has ever Voltaire defined holidays in his Philosophical Dictionary "Certain days set apart by passing such days is to sit and yawn your head off. As in so many others of the little disturbances of life, the cure for holiday boredom is reading.
They say that holidays are the thing but placed in the say that holidays are the thing but placed in the say that holidays are the say that holiday tasks.

proaches to the matter. One school of book-worms

holds that one should read something completely different from what one reads for the rest of the year. For example, the clergyman should take thud-and-blunder thrillers, the poli-tician moral philosophy, the journalist poetry (the Metaphysicals, I think), the barassed housewife with small children the Bhagavad Gita, the banker highly coloured historical romances. We might call this approach to holiday reading the Lycidas school; tomorrow to fresh books and authors new. Its most conspicuous exponent is my friend Erich Segal, who during the working year is a professional classicist specializing in ancient comedy, particularly Plautus, and on holiday reads, and indeed writes, romances such as Love Story. Another approach to holiday

reading is the self-improvement or Emile Coué sect: every holiday in every way I read something that is going to make me a better and a wiser person. Such a holiday reader sets himself or herself some great literary or intellectual project. This summer I am going to read the Iliad of Homer in three the church to be spent in holy ideness, which is favourable to piety". The safest way of stand Einstein, or find out avalanche of new books. It is whether there is anything other than flatulent jargon in sociology. I dare say that this instinct derives from childhood

I had one of the last of the old-fashioned gent's classical cent but possibly a little narrow I remember a parent complain ing to the Sixth Form Greek master that it was possible for a boy to spend five years at the Old Coll without having read a word of Shakespeare or Dickens other than passages that he had been invited to translate into Greek or Latin prose, Latin elegiacs or lyrics, Greek iam-bics, or, if he was good, for a change, Greek lyrics. Dear R.C.M. replied, with the refined elitism of Plato: "The boys can read all that in the holidays." The spirit was willing, but the flesh was weak. There are gaps in our reading, and we shall fill some of them this summer.

Another school of holiday

A very strong year so far for your higher (or whatever inadequate epithet you choose; "serious"? "intelligent"?) fiction. I must read the new Iris tion. I must read the new Iris Murdoch. The Philosopher's Pupil, and the new John Updike, Bech is Back. I have read the latest William Trevor, Fools of Fortune, a beautiful and terrible love story about the Anglo-Irish connexion, but I should be pleased to read it again on holiday. I like the sound of Jumping the Queue, a first novel by Mary Wesley. I can live without Deadeye Dick by Kurt Vonnegut, and Gore by Kurt Vonnegut, and Gore Vidal's Duluh sounds an antidote to holiday pleasure. Anita Brookner's Look At Me, about an intelligent woman on her own, sounds as clever and subtle as her previous two; which means that it is up near the top of the First Division.

As an exotic curiosity I commend to your attention A

readers, in February the Book Marketing Council ran one of its promotional wheezes, with the absurd concept of the 20 best young British novelists; a value judgment over which no two readers in the United Kingdom are going to agree. But it had two merits. It sold a lot of good novels to people who would not otherwise have bought them. And it means that the books of some of our brightest and best young novelists are available in paperback for carrying to some crowded beach that is forever England. You can take your pick from Will Boyd's A Good Man in Africa to Andrew Wilson's Who Was Oswald Fish? and be sure of finding something to please you, depending on your idiosynscrasy and tastes.

"Providence sees to it that no man gets happiness out of crime": so wrote Vittorio Alfieri in his famous study out of Orestes. Possibly so, Alfieri; but of crime fiction, which gives many people great happiness on holiday. At home in the country of Agatha Christie

First published in 1911, Small Country Houses of Today, edited by Lawrence (Antique Collectors' Club, £17.50) takes you straight to the heart of Agatha Christic Land. Or that is the immediate impression. These surely are the very residences of her prosperous and not very imaginative middle class - the Colonel, the Bank Manager, the Retired Indian Civil Servant, the Doctor, the Imaginary Invalid,

One house is singled out as having a "man's room" (not what Americans call a "men's room") for callers one wouldn't wish to admit to the rest of the house - just the place for seeing creditors, revenants and blackmailers. There is even a touch of Tony Perelli, Edgar Wallace's music-loving gangster in On the Spot, about the Birmingham specially designed to amodate an amateur or-

They are not, however, the kind of houses Poirot cared for. Comfortable? No doubt. But also unbearably fussy. It is just as if a number of these capable architects, otherwise perfectly respectable, had got together to see which could produce at once the most trivial and the most self-assertive design.

Not for them the unpretentious but satisfying simplicity of, say, an early eighteenth-century farmhouse (roughly the same size as many of these particular Edwardian confections), agreeable even when taken from a pattern book, as most of them probably were.

The Industrial Revolution had intervened. Now it was Arts and Crafts time. The revolt against the machine-made was at its height, and it was to be some time before there arrived the conception of the house as a motices with approval the machine for living.

hand (of course by people who had a gift for it), the exploitation in unsuitable circumstances of forms admired in ancient cottages, and the rather higgledy-piggledy combination of a number of unlikely elements to make "such a pretty house!"

Emerging from Agatha Christic Land we come upon some real houses, and it is reassuring to find that Weaver, too, has his reservations. Medieval ideas are too remote from modern life to be a lasting inspiration, except in the proper use of materials: "We are moving in the direction of another eighteenth century". Sure enough, there are some excellently formal buildings, besides a spirited, idiosyncratic one by Lutyens.

It may be observed that not all architects of the time had such complacent clients or were so fortunate in their builders. I know a large house in Buckinghamshire built in 1901 for a new and virtuous baronet. He was particularly fond of a certain hill, and caused the whole plan to be swung to the south-east in order that he might feast on the view.

For each house recorded by Weaver he adds photographs of the outside from various aspects and of some of the rooms. He place" - a central living room Meanwhile there was a well- also used as a dining room

seems to have had good value for his money. The house with the "man's room" mentioned above also contained three sitting rooms and five bedrooms and cost less than £2,000. A thatched cottage in Wales, which "though it has three sitting rooms of adequate size, yet it may rightly be called small, as it was designed for a lady with one servant, and has only four bedrooms", cost

At the price of the Lutyens house we can only guess. A handsome one at Wimbledon, practically a mansion, in 1903 cost £5,080. Compare these prices with the £56,000 that may be asked and obtained today for one of a row of 20year-old bungalows that seemed to me expensive at their original prices of under £4,000. Yet in the 1930s money would oc-casionally go farther than before the First World War.

Early in the decade friends of mine, seeking to economize, sold their much-loved family home, but found instead a tolerable substitute in Norfolk. This consisted of a striking Georgian Gothic "cottage" with three or four sitting rooms. 10 bedrooms, stables and lodge, together with 20 acres of parkland for £3,000. Of course it still required what we now call a "staff" of four to run il so that opportunities to

As late as 1953, if you kept your eyes open, you could find almost unbelievable bargains. Thus an advertisement in *The* Times might (and did) lead to a beautiful and unspoilt early Georgian farmhouse containing three sitting rooms, four or five bedrooms and such delights as a spiral staircase to the attics, together with an acre and a half of land for £2,500. It was love at first sight with me, and I've

Soothing face of a savage thriller

Crime writing has two faces. Or rather backsides. There are the spreading hips of the cosy, and there are the lean buttocks of the hunter. An example of the Cosy is Puppet for A Corpse by Dorothy Simpson (Michael Joseph, £7.95), a whodumit in the fine tradition of the puzzle game, if with more of real human dilemmas in it than, say, most of Agatha Christie.

William McIlvanney's The Papers of Tony Veitch (Hodder & Stoughton, £7.95) takes us to the underworld of Glasgow where rumours of a fine haul to be made effectively stir the murk and bring into thoughtful action once again the epony-

Yet a suspicion half-raises itself in my mind: is this combination of the tough and the sensitive a true fusion or is it simply a successful temporary combination like oil and vinegar in a dressing? Here is an egar in a dressing? Here is an example (a down-and-out is talking): "See that Sigmund Fraud? Ah coulds learned him about people". It's a good one, it says semething about Glasgow (and, incidentally, it exemplifies McIlvanney's skill in transliterating the periols but in transliterating the patois) but isn't it a tiny bit of a fraud-itself? Or is it? Sometimes I think I detect a similar sleight-of-hand in Raymond Chandler, a faint falsity, a hint of poeticizing. But for most people Chandler works. And I find no

He wrote he was trying to find out the particular form of the interrogative particle "when": "I inquired of an intelligent Arab with whom I chanced to be walking, 'Supposing you were to meet a man with an ibex on his shoulder. how should you ask him when he shot it? He replied; T shouldn't ask him at all because I shouldn't care'. 'But if you did care, what would you say to him?' I persisted. 'Why, I would say good morning'."

Amelia Edwards arrived in Cairo about 30 years after Flaubert and Du Camp had left their brothels and their Turkish baths. Her A Thousand Miles Up the Nile, reissued with an introduction by Quentin Crewe (Century, £5.95), was first published in 1877 and was a bestseller at once. She came to the Orient par hasard. She and a friend were in central France on a sketching holiday: "At Nismes (sic) it poured for a month without stopping. Debating at last whether it were better to England or push on farther still in sunshine... Cairo carried it. Never was distant expedition entered upon with less premedi-tation. We had taken refuge in Egypt as one might turn aside into the Burlington Arcade - to get out of the rain." I think this is one of the best travel books I have read.

Howard Carter was a traveller to the past of Egypt. No one of my generation can fail to remember the fantastic excitement of the discovery of again his popular account, The Tomb of Tutankhamun (Century, £4.95). As John Romer says in his preface to this new edition it is "one of the finest works of popular archaeology ever written". Buried in thought or sand?

Books furnish a holiday. That last job round the bookshops can be almost as important as buying the travel tickets. Should holiday reading be dignified by deep thoughts or singered up by riotous farce? Perhaps both.

To start with, among the new paperbacks, there is Tom Sharpe again. His Vintage Stuff (Pan, £1.75) features some dreadful schoolmasters in a proposterous (but not quite incredible) minimal public school which prides itself on its "Assault Course for Overactive Underachievers" which is just about what the teachers and pupils are. When these assault course techniques are mixed with a thirst for adolescent heroism and let loose upon real life, chaos predictably results.

All the characters are unpleasant; most suffer unspeak-Tutankhamun's tomb in 1922 able humiliations. G. J. Scrimgeour (Pan £2.50) attempts to convey similar insights into twentieth-century attitudes and ideas but it covers much more ground. Elizabeth Wingate, the first sentence tells us, "was not beautiful, but manners, grooming and voice made her seem so". It is not a promising start. Her life not only spans the most turbulent years of this century, it also takes in some of the most dramatic locations. She is the young wife of a British business twenties; an older mother in Hollywood in the thirties and a young widow in London again by 1939.

She is busy being a woman of her times which is difficult because nothing quite fits. She is Irish in England and pro-

The first package tour operator was probably a Venetian galley owner who, in 1458, provided a round trip to the Holy Land, with subsistence on board, for a fixed sum. Thomas Cook started his continental oper-ations with a trip to the Paris Exhibition of 1855. Pausanias (c. AD 150) wrote a 10-volume guide to Greece, which is still useful. The Crusaders were asked not to carve their names on Jerusalem's holy buildings -but combating vandalism was already a lost cause for Egyptian tourists were doing it on the Pyramids in 1244 BC.

Geoffrey Hindley's Tourists, Travellers and Pilgrims (Hutchinson, £9.95) has produced a well and catertainingly illustrated book in which you can browse with great pleasure, provided you don't mind a completely mixed-up chron

Maxine Feifer's France is not. as the title states, Everyman's France (Dent, £12.50), but her own. She hops about all over not so long ago that a man's the place and presents a mass of world there was bounded by the indigestible facts of which the least digestible is the chapter on him. Gastronomic France The book is sprinkled with

photographs, plain and coloured, by Harold Chapman. The text is part history, part art, part craft, part "folkloric" and part detailed guide-book to a few cities. It may make you want to go

to France, but if you do go, my money would be on the little green Michelin guides where you can find the information properly collated and set out.

Rome (Harvill Press, £7.95) is

a sensational book. The city has been Paul Hofmann's base for 25 years as a foreign correspondent of the New York Times. Racily written, his account of it runs quickly from chapter to chapter: these are luckily very short and allow one to regain one's breath in between. It is a story of murder, kidnapping, robbery with violence, drug-taking, scandals in finance, soccer, religion, and political portrays in Lord of the Dance (Arena, £2.50). In this extraintrigue of every kind.

Greece and its islands are under the developer's hammer. John Abdon (Ebdon's Iliad, Heineman, £8.95) knows this and writes about it briefly. One of his Greek friends tells him that his desire to keep Greece unchanged and for himself is ridiculous and that he should realize that tourism means prosperity for the Greeks. Ebdon has written a sensi-

tive, amusing, and earthy account of visits to Kardamena, Terrible things happen to them. They are caught up in wars and intrigues, they meet Karpathos and Rhodes, His characterization is good and wholly convincing. Some of the stories are about his own experiences, some are collected from others. His prose has a timeless and mystical quality which recalls a Norse saga. Bernen's friends are people of few words, except that when their tongues are loosened they may talk all night. Their lives are, like his own, bound up with the wild hill sheep and the dogs, often of uncanny understanding, who serve them.

Heat comes from the neverquenched turf fire, and the staple food is tea, bread and butter and spuds. Well before the end of the book I found myself believing in water-horses, sword-nosed dorhos and winged eels.

Melvyn Bragg has two qualifications for writing Land of the Lakes (Secker & Warburg, £9.95). He was born and brought up in the Lake District and has gone back to make his home there. home there.

In an exceptionally well-de-signed book where the illustrations match, more or less, with the admirable text, he deals with geology, landscape, history and language. Hill farmers seem to do

rather better than those in Donegal; anyway they hunt the fox, mainly on foot; they wrestle in embroidered Victorian wear: they race to the top of fells and back again, and the common man keeps a swift dog for hound-trailing behind a Kiely (OUP, £4.50) is one of a drag. These and rock-climbing

The same active ingredient is used in several proprietary weedkillers, but often there are different mixtures and the percentages of the various constituents vary according to the specific purpose for which the product is intended. It is essential therefore that the manufacturers' directions should be read and rigidly followed. When using chemicals, never add "one for the pot" to try to increase the

It is important to be able to

identify weeds, as different treatments are applied to different species. Daisies, buttercups, dandelions, plantains and clover are fairly readily recognized but parsley-piert, hawksbeard, bird's-foot trefoil and pearlwort are not. A book entitled The Need to Weed by Valerie Ailes, published by and obtainable from, the Murphy Chemical Company, contains illustrations of most weeds, including those that afflict lawns.

Lawn weedkillers should be applied in the spring and early summer for the best effects. This year conditions have been perfect for their application; both grass and weeds are growing vigorously after the heavy rain. Where the turf is in not too

Strictly for the hale and the hardy, Richard North maps out a journey of invigorating and visceral delight

Rediscovering the splendour of Britain's rugged north

You know you are in the north car park or lay-by. Something country when the postmen have about its suddenness, its abrupt Land Rovers and the police stations sprout notices telling householders how to mark out their back paddock for the helicopter bringing them sup-plies in the event of a snow-in. Dry spell and a long ladder

But the two big differences between painting indoors and out are that you have to cope with the weather, and you need to scale greater heights.

The drawbacks of bad

weather are obvious: you cannot apply paint to a surface on which rain is beating down. But sun can be almost as big an enemy of new paint as rain. Heat, playing on paint before it has set, will encourage blisters.

The perfect weather would, in fact, be a long, dry, cloudy spell, coming at the end of a eatwave, and with no wind, The heatwave would have dried everything out, so that your new paint would not be scaling-in moisture, especially on woodwork; and the absence of wind would mean no dust being blown on to wet paint. Never put paint on surfaces

that are wel, or in direct sunlight. Professional painters have the same motto as holiday makers — "follow the sun". Wherever they can, they like to start work in the east wall of a house, once the sun has moved on, then follow on to the south wall. That way they are always working in shade, and on surfaces that the sun has dried

For access you need a ladder, or a scaffold tower. Both can be hired (see your local Yellow Pages), but a ladder is a useful thing to have, so purchase should by considered. Expect to pay up to £50 for a strong, easy-to-carry aluminium one, tall enough for a two-storey house. Hiring a ladder with "standoffs" (they hold it clear from a

gutter, so you can paint it) costs about £5 a week. Make sure your ladder is safe. The it securely - at the bottom to stakes driven into the ground, at the top to stout hooks screwed into the fascia

board. To raise a ladder from the horizontal, lay it flat on the ground, and get a helper to stand at one end, with a foot on the last rung. Go to the other end, hoist the ladder above your head, then walk towards your helper, raising it as you go. Carry a ladder upright, not extended, locked against your body.
When you climb a ladder

Care and repair for cracks and holes

Walls should be dusted down with a brush. Scrape off any loose and flaking material. Cracks and holes can be filled with a sand/cement mix - the small dry-mixed bags sold at DIY stores are suitable. Builder's merchants sell pebbles to add to the mix if you are working on pebbledash. The mortar can be applied with a small trowel or filling knife.

Fill deep depressions in two stages, scratching the first with the point of the trowel before it hardens, to provide a better key for the second. Bare patches need treating with a primer. If the existing finish is sound, rub your hand over it; if a chalky deposit is left behind, it needs to be primed.
Finally, do not work too late

into the evening you should have finished long before dew starts to form, for its damp will affect the final result.

REVIEW Classical record of the month

A debut that delights in Verdi's verve

Dimitrova/Domingo/Cappuccity Nasierenko. Deutsche Oper Orch./Sinopoli DG 2741 021 (three discs/cassette) Verdi : (masnadleri Sutherland/Bonisolli/Manuguerra/ Ramey. WNO orch./Bonynge.

(Decca D273D3/cassette) By coincidence the highly successful concert performance of Ponchielli's La Gioconda at the Barbican last month shares Cappuccilli. Or is it coincidence? Domingo is the obvious first casting for a Verdi opera even when the tenor role is as slight as it is in Nabucco.

Dimitrova has made a Con-

corde-like ascent through the thin ranks of dramatic sop-

ranos, although she is yet to be heard at Covent Garden. it would not be easy to improve on that casting. But DG have a bonus; it comes in the shape of Giuseppe Sinopoli-making his opera debut on record. Mightily impressive it is, too. Despite the power and experience of his forces Sinopoli takes command at once. He has clear relish for the energy and rawness of Verdi's third opera and first success. The score is an odd mixture of arias which are virtually frozen in time and those choruses, flavoured with resorgimento-style patriotism, which surge forward and were to become one of Verdi's trademarks.

Sinopoli and the orchestra of the Deutsche Oper, Berlin (where he has conducted Nubucco to great acciaim) do tible as Cappuccilli. If there is a not attempt to mute the suspect part of the voice now it clamour of the brass. On the appears to be the bottom contrary. to the bloodthirsty cabaletta that follows. Cappuccilli has the thread of melancholy in his voice which the best Verdi baritones require and his account of the title role shows him throughout on peak form.

Evgeny Nesterenko is no less powerful as the High Priest, Zaccaria. It is not usual to put Domingo last among the princi-pals but ismaele is an unre-warding part and DG did well the same vocal spearhead as Verdi's Nabucco newly released from DG: Placido Domingo, Ghena Dimitrova and Piero and P Outstanding set.

I masnadieri, based on Schiller's Die Rauber, followed five years after Nabucca. Decca are unfortunate to bring their new set out virtually simul-taneously with the earlier opera: it was originally scheduled for April release but it is only now finding its way into the shops.

Bonyage's conducting, par-ticularly at the beginning of the opera, sounds pallid beside Sinopoli, although the Orchestra and Chorus of the Welsh National Opera are out to demonstrate that they know the piece well, as indeed they do since it has been in the company repertoire for some years. Nor do I greatly care for Bonisolli's brawny approach to the hero. Two imports from Conifer are specially worth noting this month. There is a reissue of EMI's recording of Poulenc's Les Dialogues des Carmélites, made with the forces of the Paris Opéra in 1958 shortly after the French premiere there: Duval as Blanche, Crespin as Mme Lidoine and Gorr as Mere Marie; conductor Dervaux, It is a collector's item and should not be missed by those who take the currently unfashionable view in Britain that this is a fine work (2C 163 12801/3. Here we are concerned with Boulez's second or perhaps third thoughts on his masterpiece. He composed it between 1957 and 1962, then recorded it in 1969 with the Polish soprano Halina Lukomska and the BBC Symphony Orchestra. The new recording, made after perform-ances in Loudon and Paris in 1981, shows again the resilience and beauty the BBC SO bring to this score and does to rether this score, and does so rather more clearly than before, though Boulez's metal instrumentation is prone to distortion. The new soprano is Phyllis Bryn-Julson, who allows the work to flower more naturally than Miss Lukomska preferred: she discovers the line, where her predecessor had tended to fling t out, and the sense of hovering in each beautiful moment is exactly right here.

Also of interest is the change in Boulez's approach, which is partly mirrored in the change of from an orchestra weighted partly mirrored in the change of vich was engaged on his Twelfth towards the pitched percuss-soloist. Pli selon pli is now a Symphony in D minor. This has

The new Xenakis disc is also to be taken seriously. Disappointingly Erato have given over a quarter of it to reissuing an aged recording of the orchestral Nomos gamma, a mechanical dinosaur of texture music, but the other two works are both more recent and more interesting. Cendrées (1974) is a massive crowd scene, for chorus and orchestra that swirls and at times thins to leave an abstractly gesticulating vocal or instru-mental soloist. Jonchaies (1977) is a colossal orchestral picture painted with screeching regular strokes and exotic melodies.

It all seemed so simple. Takethe skills of the players who over the past decade or so have recreated the sound of baroque music on period instruments, push them forward a little in time, and set them to record all the Mozart symphonics. And inal", a landmark in the history of the gramophone. If the results have not been

quite as satisfactory as that, it is scarcely a matter for surprise. The initial releases in Academy of Ancient Music's series were indeed a revelation, but as the Mozart symphony cycle progressed very fast it became clear that many works were being recorded without a great deal of thought about their special problems or character: every detail of the appropriate forces and even layout had been thoroughly considered in Neal Zaslaw's research, but the musical results were sometimes scrappy and under-

The main problems have concerned not the fast movements, which zipped along with enormous verve and energy, marred only by a hint of rhythmic predictability, but the slow movements. Here it sounded as if Schröder and Hogwood, while concerned to break the accepted conventions of long legato lines and smoothly sustained lines, had found little that was eloquent or

rhetorical to put in their place.

Now the final two volumes in

the series have appeared, and it is a pleasure to report that in many respects the playing has matured immensely. Among the final group of great symphonies, some have been completely rethought: the opening of No 39, with its baroquestyle dotted rhythms, crisp timpani and cascading scales in the strings, is splendidly done, as is the lilting triple-time Allegro which follows, with its woody flutes and clarinets. It would be difficult to find an orchestral texture more sheerly exciting than that of the "Haffner's" blazing D major first movement, with its crescendos vigorously controlled.

Nevertheless, there is a recurrent dissertisfaction that the music has not been ponrehearsed closely enough. A sublime slow movement such as and rather scrappily at that,

while in neither of the two versions in these two boxes (one with clarinets, the other with-out) does the first movement sound anything but facile, though it is scrapulously neat. The Paris, a light, extrovert work, fares well, with skating violins in the finale and gently distances. The finale and gently plangent lines in both the slow movements of the two versions.

I am not pleading for a more overtly expressive approach: indeed, these performances are best when they are most different from conventional sweet accounts of Mozart and most worrying when they charge through the fast movements of the "Jupiter" like the English Chamber Orchestra on a bad day.

There could scarcely be a more striking challenge to the Schröder/Hogwood approach than that represented by Niko-Mozart recordings, for he too is a pioneer with period instruments. But here he has cheful to work with a superbly skilful modern orchestra, the Concertsebouw, and to transform their playing out of all recognition. Everything Harnoncourt does

is stimulating, and much of it is infuriating. There is never a sense of chugging through the music: indeed, in the first movement of the "Jupiter" he breaks up the music with pauses, rubati and accents which seem disconcerting, even stupid - but then at a climax like the fortissimo A flat chord which follows a bar's rest. he blasts home the true force of the music with staggering power. Harnoncourt's slow move

ments do not always work, though that of the "Jupiter" has an aura of ineffable mystery about it, which is more than can be said for the Academy's. Some ideas in the "Paris" symphony quite misfire, as does the minuet of the "Jupiter". I was at first unconvinced by the hushed, smooth, start of the "Jupiter" finale, but the sense of progressive tension and excitement is irresistible, and when Harnoncourt unleashes triumphant horns and then brittle. noisy timpani in the contrapuntal coda, the listener is caught up in the sheer glory of

"In so many ways, of course, the situation is contemporary.

Apart from her husband's dole the only money that comes into Maggie's house is her own pay packet, which obviously causes great friction. She asks 'Why are the dishes still dirty when I come back from work?'. He says, 'I'm not turning myself into a skivvy jast because I'm unemployed. It's paar job.'

"And indeed, in a world where economic pressures are so fierce, can you afford morality, or should you accustom yourself to crime? As Brecht said, Bread is the first thing, morals follow

As with The Empire Strikes Back, George Lucas serves as executive producer rather than director. "It's still my story", he told one interviewer about Empire, directed by Irvin Kershner, "I just didn't have to do all the work."

Relieving the work load this time is Richard Marquand, from Britaks, responsible for telebritain, responsive to the horror film The Legacy (1978), Birth of the Beaties (1979) and an adaptation of Ken Follett's thriller Eye of the Needle (1981) (1981).

Frankly, he seems a strange choice, though perhaps Lucas picked him simply because he would not get in the way. Marquand certainly felt nothing but awe towards his employer. "Having George Lucas as executive producer", he said, "is like directing King Lear with Shakespeare in the next room."

Collecting

Cachet that makes a mint of difference

All collectors wish upon them-selves a little immortality, and coin collectors are no different. As famous collections are sold there is pleasure in obtaining one or two coins from them, or in finding pieces, in dealers' stock or in auction sales, that come from the famous collections of earlier generations. Yet it is curious that of the many thousands of art objects sold every year, so few come from recognized collections.
With many of these sales one

must respect the anonymity of the vendor, but with coins there is so much to be learnt from the pedigree or provenance. There is a record of prices that the coin fetched each time it came under the hammer, and sometimes more, for many of the famous old collectors were more than mere scholars; and

Female player who packed a punch in the past

For more than a thousand years women chess-players have been inferior to men at the game. True, around AD 800 Dilaram must have been better than her to sacrifice a rook rather than second-class afternoon session

at Hastings.
Nevertheless, it seems to me that women have been improving at the game all my life. For my youth as a master coincided with the rise of Vera Menchik, a talented woman, half-English and half-Czech, who won the women's world championship in the 1930s. She was certainly of master strength but, alas, she was killed by a German buzz-bomb in the late stages of the Second World War.

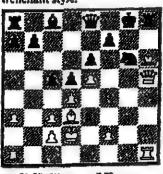

The advent of the remarkable in the 1939-40 Trophy Tourney Georgian women players greatly of the British Correspondence transformed the international Ches Association. picture. Two of them, Nona Gaprindeshvili and Maya Tchiwoman grandmaster (or should it be grandmistress?) in Dr Yana Miles, as well as a number of very promising youngsters. Some, if not all of them, should develop into grandmaster strength and might even do better than their male colleagues in their own Olympiad.

Grosvenor confounds by caprice

The Grosvenor coup is a comparatively new addition to bridge vocabulary. It was first described in a satirical article in m American magazine in 1976. Here are one or two examples of the mythical Mr Grosvenor's himsical diversions.

1764 14 2 W E s AK853

Declarer, because of the bidding, has placed East with length in this suit. With the idea of felling a singleton 9 or 10 in the West hand, which is mathematically twice as probable as a singleton queen, declarer plays the knave from dummy. Grosvenor unemotionally contributes the 10. Nat-urally concluding that his original plan is doomed, declarer decides to play for the drop. Again, Grosvenor is East, with the trump suit distributed

as follows: Q1026 N 973 W E KJ 4542

Declarer plays the ace and Grosvenor follows with the king. Obviously declarer finesses dummy's 10, losing to Grosvenor's knave.

The information in this column was correct at the time of going to press, tate changes are often made and it is advisable to check, using the telephone Although nothing is lost, nothing is gained by these manoeuvres. So what is the point of them? Grosvenor claimed that the psychological effect on his opponents was such that they immediately bid or played in an irrational manner because of a natural sense of outrage.

The question arises, can a Grosvenor ever show a profit? Look at this hand from high stake rubber bridge.

He ruffed West's lead of the OK and without a care in the world played a trump to dummy's acc. East, recognizing that the only hope was to evoke some imaginary spectre, dropped-the VK! A ruse which could have succeeded against a good player. But this South treated the play with the disdain of a tank running over a bramble bush. Not only did he play another heart, he had the gall to finesse the 10. When the trumps broke, he lost only a spade. trade deficit as imports surge

Current account slump is worse than City feared

By Frances Williams **Economics Correspondent**

Britain's balance of payments on current account plunged into the red last month, And new figures confirmed that the country became a net importer afactured goods earlier his year for the first time in its industrial history.

The April trade figures,

which were much worse than the City was expecting, bear out fears that Britain's tentative economic recovery is sucking in ever increasing quantities of imports while exports (other than oil) have levelled off after a strong performance late last The balance of payments

swung from a surplus of £565m in March to a £180m deficit in April. This was entirely the result of a £744m deterioration in visible trade from a £384m March surplus to a £360m while the imports rose from deficit last month, with the £4,907m to a high of £5,164m.

Exports fell back steeply from their record March levels of £5,291m to £4,804m in April,

Though lower oil exports were a factor, most of the deterioration came in non-oil trade where the deficit widened by £596m to £834m, second only to January's £1,001m deficit ~ the piezest recorded.

The Tilling bid laid bare

City Comment

Shareholders in Thomas Tilling (not to mention those in BTR) must be getting thoroughly confused by now on the BTR bid for Tilling.

The story so far goes back a dawn raid on Tilling shares by BTR early last nonth, followed by a full bid - then valued at £576m in shares, or £538m on the 185p a share cash alternative. Before speculation broke out Tilling's shares were 123p after a disappointing year.

Condensing the arguments for reasons of space. Tilling cried "rape!", accusing BTR of wanting to strip off its valuable assets.

BTR said, "Nonsense, we can manage them better. That's all." Early on in the piece Lord Cockfield, the trade secretary, took the amazing decision of not sending Britain's biggest ever bid to the Monopolies and Mergers Commission, thus allowing a free-for-all.

This is what it has become. Tilling's powerful defence of a 113 per cent increase in profits to an alltime high of £95m brought question marks plus a much more realistic bid from BTR: £664m with a cash alternative of 225p a share. All the while, BTR was buying Tilling shares in the market as hard as it could

Tilling's reply to this verged on the self defeating: with proposals to sell the most alluring assets itself if the BTR bid failed.

BTR in turn pointed out that it could (although carefully not saying it would) prevent this desecration since it had control of enough shares to block approval of such deconglomeration. How, one asks, could the BTR board justify that to its own shareholders on the grounds of its previous arguments?

The odds are still on a BTR win - it is steadily building its stake in the market at the cash alternative price and its own shares are holding up well.

Summer lettings

Holiday home owners seek relaxation on tax

owners of country cottages will be trying to let their second homes to families for a holiday break. Answer, when you lose one month's interest on money withdrawn.
This is the cafeh with Gateway building society's Superplus Account which society a superpute recount which offers 7.5 per cent net of basic rate tax on investments of £500 or more. Cash can be withdrawn on demand but you lose one month's interest on money withdrawn and you cannot avoid the penalty by giving a month's notice on withdrawal.

If you keep £5,000 in the account you can take the interest monthly or leave it to accumulate, giving the equivalent of 7.5 per cent a year.

Health

A private plan for elderly

More than half the people currently waiting for National Health Service treatment in spitals are over the age of 55. Waiting lists for the more common operations can run into many months or even years.

A new medical insurance me from Private Patients Plan offers medical insurance to the elderly - including anyone up to the age of 75 - at an affordable price PPP emphasizes that the object of the scheme is not to provide cover for long term chronic Bliness, but to ensure that anyone needing treatment for an acute condition is able to get that treatment without a long wait.

The plan gives a full refund of all medical costs up to £4,000 in a year, or £8,000 for heart operations. Premium for a 65-year-old is £11.65 a month or £15.75 for those in the 70-to-74 age bracket. No medical examnation is required and the cover is renewable at all ages (though you must be under 75 to join).

To claim benefits the treatment required must be unobtai-nable through the National Health Service within six weeks of the patient seeing a consult-ant. If treatment is received in a NHS hospital without charge, a cash benefit of £15 a night is

payable.
PPP claims that its Retirement Health Plan offers the elderly cheaper medical in-surance than that quoted by other companies. "This plan is another first for PPP since no other company offers a medical insurance scheme specifically for the retired person or mainly for the elderly", commented Mr John Phillips, PPP's chairman.

Tailored for the individual

Until recently private medical insurance has been almost synonymous with BUPA and PPP. Crusader Insurance, the fourth largest private medical insurer specializing in group schemes, plans to change this with the introduction for the first time of private health schemes for the individual. It aims to settle within 48 hours of receiving a claim and argue its rates are cheaper in most cases

than its competitors'. For example, it claims a single person aged between 18 and 29 under BUPACARE of £17.33 in London as against Crusader's 13.76; a single person aged between 50 and 64 under BUPACARE would pay £26.96 in London as against £21.40 with Crusader; and a family living in the country where the parents are aged between 30 and 49 insured with BUPACARE would pay £34.45 as against Crusader's £27.52. Crusader claims that the actual cover provided is better in most cases and it will now the cost of cases and it will pay the cost of a mother or father staying in hospital with a child which it

says is a unique benefit. There are three scales of cover to choose from - London, country and general. All provide the same cover for surgeon's annesthetist's, and specialist's fees but the benefits payable for in-patient accommodation are tailored to the scale of hospital accommodation cover you choose. The amount of cash benefit payable if you have inpatient treatment free of charge in an NHS hospital also varies

Supplementary benefit

The form when unemployed school-leavers claim money

Any summer sun after the past few months of rain is not likely to be much consolation to those youngsters within weeks of leaving school, but with little prospect of finding themselves jobs. They have to face up to life on the dole.

Their immediate problem is butions at some time, and 16year-old school-leavers will not have been able to do that. For them supplementary benefit is

the alternative. One difficulty is that sup-plementary benefit is not paid automatically. Besides being affected by casual earnings and savings of over £2,500 (going up to £3,000 in November), they cannot claim the benefit until the end of the summer holiday. Most jobless school-leavers can start getting money of their

if they get other social security benefits as well, they can carry on getting the extra for each school-leaver in the family. This arrangement, too, stops from the first Monday in September.

Something similar applies at Christmas and Easter. Schoolleavers then cannot claim supplementary benefit until either the first Monday in January or the Monday after Monday, whichever own from supplementary ben- follows their date of leaving.

There are some exceptions to this. For example, schoolleavers with children of their own can get supplementary benefit right away, as can disabled school-leavers or those not living at home and not

being kept by their parents. As a school-leaver there are a number of ways in which you can go about getting supplemen-tary benefit. First, you have to register as unemployed. If you are under 18 and need money, your careers officer can give you a card to take to an unemployment benefit office. Over-18s should go straight to this office. If you have to travel more than six miles, ask if you can make

future claims by post.

'Successful first year of operations with firm foundations laid for the future

REPORTS SIR GORDON HOBDAY, CHAIRMAN CENTRAL INDEPENDENT TELEVISION PLC

• First year was one of considerable achievement with pretox profit on ordinary activities of £3.5 million for the year to 3i December 1982.

 After taking into account extraordinary items associated with the setting up of the company a loss after tax of £685,000 is reported for the year. • For the purposes of comparison with the

prospectus a profit, after extraordinary items but before tax, of £562,000 compares with the anticipated loss of £3.4m on which the prospectus was based. Results have benefited from a higher level of

advertising revenue and rigorous cost control. ● Following sale of 51 % shareholding by ACC, Central now has three shareholders — Sears Investments, The Ladbroke Group and D.C. Thomson — with 20% and one — BPCC/Pergamon — with 12½%. The remaining 27½% is widely held by smaller shareholders.

• The Directors intend making an early application for the company's shares to be quoted on the

Clyde Petroleum's brief flirt-ation with Saxon Oil has ended. Yesterday Clyde sold its remaining 10 per cent stake in Saxon amounting to 1.5 million

shares at 175p. News of the sale of the shares wiped 5p from Saxon at 180p and dashed remaining hopes that the proposed merger between the two groups inight take place. Clyde had originally made an agreed bid of 122p a share, but news of a big oil find share, but news of a big oil find victory for the Conservatives in the conservative in the conservati on block 16/8b in the North
Sea, in which Saxon had a 50
per cent stake, put paid to that.
The Saxon board immediately urged its own shareholders to reject the terms which valued from under them after the Bank

Saxon's financial advisers wrote to shareholders telling them the company was investigating ways of raising cash for further appraisal drilling on the field, but ruled out further cash cails.

Clyde still holds an option to buy a further 10 per cent of the company at 100p a share. This leaves it with a paper profit of £1.74m from the

SOUTHAMPTON: Hampshire (22 superb drive off the back foot to a pts) beat Worcestershire (6) by seven ball of full length.

One of the delights of cricket is One of the delights of cricket is that even the dourest struggle can suddenly burst into dramatic life. Few games can have done so in such eventful fashion as yesterday's when fast bowling and batting wrested the centre stage from the medium-pace men and a thunderstorm provided a final twist in the last act before Hampshire won with two overs to spore.

If that over was won by King on

It was all highly unlikely after the first two days of attrition. They had not been uninteresting but Marshall lifted the march on to a higher plane

as he tore Worcestershire's second innings apart in the morning.
He looked a yard faster than on the previous two days and the unseemly chuckles on the Worcestershire balcony when Pridgeon, the nightwatchman, desperately fended a ball away from his heart where more the product of nervous anticipation than sadistic humour.

Neals however, were Moreheller

unseemly chuckles on the Worcestershire balcony when Pridgeon, the nightwatchman, desperately fended a ball away from his heart where more the product of nervous anticipation than sadistic humour.

Neale, however, was Marshall's first victim and it was the arrival of King as his replacement which provoked the bowler to build up his full head of steam. King was not cowed, even eschewing the helmet which looked an obligatory piece of equipment on this occasion, as he began by launching himself at Marshall's slower ball, followed by a sand Illingworth induced periods of

circumspection, Greenidge had steered Hampshire towards an apparently comfortable victory with ball of full length.
Battle was joined and Marshall's minth over of the morning provided a commanding century when an approaching thunderstorm threatened to have the last word.

For Warwickshire's second wicket these two added 289, Amiss making his eighty-third first-class hundred and Lloyd is ninth, and by some way his highest score. Having just had a fortnight out of action with a back injury, Lloyd made a tortnous start. After 80 minutes he had added only eight to his had added only eight to his overnight score of 28. Essily the day's most confident batting came from Butcher as Surrey sought quick runs before declaring. Butcher soured the 48 he needed to complete his century in only 52 balls. NO PLAY YESTERDAY

Daniel, grunting as he laboured to extract bounce, bowled for an hour, and much of the time it was needlessly short, particularly to the No 11, Willcins. Selvey lost his middle stump to a yorker from Cowans, but Wilkins, evading the bouncers, managed to get his bat to the straight balls.

Emburey had a brief, inconclusive spell and then Williams replaced Cowans. Williams in the first innings had bowled first, straight and so a full length, much in contrast to Deniel, but this time he was rather off target. Williams that him past cover for four, hooked him and then drove a full tost past mid-on, taking nine off three balls.

than Lancashire were able to do.

Lancashire had a good foundation laid by Fowler and Cockbain, who scored 42 in the first hour before the run rate then dropped. Clarke's line was wayward but Thomas tested Fowler thoroughly and Monkhouse also bowled with whole-hearted effort later. Cockbain's defences had no chance against a ball which Monkhouse got to rear and a catch to point resulted. Hayes was caught in the same place trying a forcing stroke on the

When Daniel took wickets with the third and fourth balls of the morning it looked as if a nice day was likely to go completely to waste. Rowe, who chipped a finger when he was caught off Daniel on Thursday, was not able to bat, and that left only apparent rabbits with little reason to delay the journey back to Swansea.

As it turned out, Glamorgan were not in the mood to be quite so brusquely disposed of. TAUTON: Sussex (24 ptx) beat

Somerset (4) by 10 wickers.

Overnight, Somerset, following on, were 129 behind, with nine second-innings wickers in hand, though Lloyds and Richards had been going 50 comfortably on Thursday evening that the game seemed still to hold possibilities for them. But both were out quickly, Richards to a vague stroke from the first ball of the second over. Ballesteros does not have much

PGA championship on the Royal St George's course yesterday.

Ballesteros was joined in the lead by Mark James, who won the Tunisian Open earlier this season, and by David Thorpe, aged 30, a club professional from Sutton Coldfield. Thorpe, a late starter, moved clear of the field when he went to four under par at the 12th but in heavy rains his attempt on the outright lead subsided over the closing holes, and he dropped strokes at three of the last four.

Ballesteros loses his humour a favourite for James. He, too, feels that the humps and the hollows can give the ball an unpredictable kick. The putting surfaces however, are right up his street. Compared with those of the last few weeks, when rain provided inconsistent greens, these must seem as smooth as a smooker table, and James puried with great authority for a 69 For once, Nick Faldo was forced ror once, Nick raido was forced to play a supporting role, although an opening 72 hardly rules out the prospect of a record fourth successive win. Tony Jacklin, the defending champion, seened to be inspired by a return to the links, but he took a six at the 18th (458 yards) and finished with 73. Ballesterus loses his humour when his touch deserts him on the greens. Such is his search for perfection that he believes he did not putt at his best even when he won the United States Masters at Auguste in April On extension at

Augusta in April. On returning to Europe, he finished third, second, and fourth in successive tournaments, and he claims that he would have won all of them if he had been in form on the greens.

Now the touch is back. What is more, it returned at the right moment because Ballesteros, after gathering three birdies in the first seven holes in difficult conditions, was feeling more than a little miserable after he skied his driver at the 12th.

The Spaniard thrust the driver back into his bag with such a force that he bent the shaft at the grip end. The ball finished in a bunker where he struck it some two inches behind with an nine-iron.

Ballesterus took two more to reach the green, but holed from eight feet to save dropping more than one stroke. Even so, he was now back to level par, and from then he had to rely on his three-wood off the toe. Losing some 20 yards on this course in such demanding conditions was a severe Augusta in April. On returning to Europe, he finished third, second, and finished with 73.

Double Shuffle to boost Murray

The racing in the southern half of the country today can that fun at Newbury, she looks that run at Newbury, she looks before the storm. Nothing that before the storm. Nothing that

the Derby draws close, nothing does a jockey's confidence more good than a winner or two to put him in the right frame of mind for the big occasion. Wassl, enjoying a boost by riding Double Shuffle to victory in the Bletchingley Handicap. He also has an obvious chance in the Saifords Maiden Stakes on Astral King but may not cope with the promising Spital-fields.

Double Shuffle's first run of the season behind the race-fit Forward, was immensely promising in view of the fact that her trainer. Gavin Pritchard-Gordon, had warned beforehand that lack of fitness might tell towards the end, because Double Shuffle had not been in fast work for as long as most of his string as she had been turned out during the winter.

Pritchard-Gordon's predic-tion came true when Double Shuffle tired in the last 50 yards after looking the likely winner a furlang out. Last seemen. Double Shuffle won twice over today's course and distance. By Michael Phillips, Racing Corresponde

Bob Weighill, the accretary of the Rugby Union, said if players had signed only an option which did not promise any form of reward they would not forfeit their amateur status. Sir Nicholas said the ARU had recently written to leading Australian players asking them to seek legal advice before they signed anything for fear they should lose their status for promises of large sums of money as yet unfulfilled.

This perhaps reflects the laissez-faire attitude of Australia who have long been accustomed to losing players to Rugby League and may therefore not unreasonably wish to

The underdogs who snapped back at authority

I was there the last time the winners scored four goals in an FA Cup Final. I am sure Manchester United will forgive Manchester United will forgive me for saying that the replay on Thursday evening was not quite the same. The performance of Bryan Robson, pregnant with authority though it may have been, I did sot quite rank with those of Matthews, Taylor and Matthewson of Blackman 20 Mortensen, of Blackpool, 30 years ago. Yet the 1983 final should be

analysed carefully by anyone fearful for football's survival. two games between relegated Brighton and Hove Albion and one of the most famous cisbs in the world which suddenly had neutral observers dancing with joy? When all is said and done, a team costing millions of pounds had required two no more than half decent matches (and they should have lest the first) to defeat the hig-hearted underdogs. One's enthusia seeds explanation.

The truth is that we have just experienced probably the most unexceptional domestic season since 1946 and then had our spirits uplified by two matches at Wembley which recaptured some of the old flame of sportsmanship and uncertainty which over a century or more has made football the foremost sport in the world.

Uncertainty

The sportsmanship, if we exclude some of Case's deplorable excesses in the first match, able excesses in the first match, belonged to Brighton, the uncertainty, at least until half an hour into the replay, to Manchester United, abetted by a class-levelling pitch in the first encounter. Here was David and Goliath, with the possibility that the bookmakers had got the odds hearthly, wrong, Romence odds horribly wrong. Romance flowed. The High Court rightly kept Foster out of the first match, only for Stevens to be the man of the moment. Wilkins, derided for several seasons by some supporters at Old Trafford, scored a marvellous goal. We searched for the word to describe this quality that the Cup Final had given us. What could it be? Why, yes, it was, my goodness: entertain-

Last Sunday, in Face the Press on Channel 4, Jack Dunnett, the President of the Footbell League, emphatically, indeed, astonishingly, denied that entertainment was one of the game's priorities, thereby putting himself singularly out of tune with the majority of the 50 million or so who watched the final and actually enjoyed it.
What the two matches have
done is reminded us of the real
reasons why the public loves the
game and that it is far too

Brighton demonstrated that fear is the killer of entertainment. Playing without fear in the Final, where they had nothing to lose, they revealed qualities which, if allowed to flourish in the Football League, would cure overnight some the ills of the game.

It is undeniable that th

decisive moment of the replay, United's second goal, hinged on the clear infringement which Alf Grey, the referee, failed to penalize by McQueen. When Muhren's corner swung across the goalmouth, McQueen fouled Foster, and the Brighton captain was still on his knees when Davies crossed the ball back for Whiteside to head into goal. Manchester United won, but

B righton made the final mem-orable. If it is true that the Brighton manager, Jimmy Melia, made a misjudgment in re-admitting Foster for the replay, disrupting the defence which had done so well on Saturday, the cheap, rancou of the crowd on Thursday which were directed at Foster provided one good reason for giving the competing clubs fewer

tickets, not more. To the names of the defeate Brighton beroes must be added Robson, who with Shilton. Sansom and Francis is alarmingly one of England's few players of outstanding inter-national quality, and Wilkins.

There has not been such a clear penalty, when Ham-burg's goalkeeper pushed Plati-ni off the ball, having misjudged the bounce, since Schumacher's Battiston, in the World Cup semi-final. The opinion of Bobby Charlton and Lawrie McMenemy, the BBC's experts in London, that it was not a penalty, simply reinforces the view that most professionals have lived with expediency so long that they can no longer objectively distinguish between

Manchester United's victory was a fitting birthday present for Sir Matt Busby, of whom the Manchester Guardian writing about the FA Cup Final, 50 years ago said: "Sometimes he does dare-devil things that makes the directors feel old before their time. HOCKEY: The six Southgate players who did not attend the last low scores, but Jack Nicklans - the England training weekend three weeks ago have been omitted from the squad of 17 invited for training at Bisham Abbey on June 5, The exercise includes two matches against the England under-21 side, Sydney Friskin writes. Clive Chapman, the chairman of the selection committee, said yesterday that the squad had been chosen on merit and availability. He explained that as the Southgate players had not attended the last training weekend they had, for the present.

offers to West Indian players. Under the scheme the West Indies Cricket Board would provide coaching contracts to 22 top regional players to remove the temptation to play in South Africa. The Government's contribution to the scheme would be \$151,000 over the three years. FOOTBALL: The 92 Football League chubs intend to reengage more players than expected for next season despite the enforced tightening of purses. Last year 442 players ing of purses. Last year 442 players were given free transfers, but this year the figure is down to 360. Graham Kelly, secretary of the Football League, said yesterday: "The fact that the clubs have been able to keep on contract almost 1,600 players reflects creditably on the way clubs are rationlizing their financial situations." There have been 63 free transfers given by first division, clubs, 87 in the second division, 66 in the third and 115 in the fourth. The average is four players per club. one of Doucarouge's priorities will be to make the existing cars considerably more competitive. Rated one of racing's most talented

The alfresco charms of Glyndebourne

A break from the music with iced champagne

Summer broke through the rain clouds suddenly this week, just in time for the opening of 1983's opera seasou at Glyadebourne in East Sussex with its traditional affresco delights of food and wine in the interval. The festival began on Thursday and will continue to Angust 10, a total of 64 performances of five operas. Highlights will include two ne productions. Mezart's Idomeneo, last given at Glyodebourne in 1974, returns in a production directed by Trevor Nama, joint artistic director of the Royal Shakespeare Company, who is making his first venture into the world of opera. Also working at Glyndebourne for the first time in this production will be John Napier, who has designed several of Trevor Nunn's theatre presentations (including Cats) and David Hessey, responsible for lighting. Bernard Haitink will conduct. The second new production is of Rossini's La Cenerentola, directed by John Cox and with designs by Allen Charles Klein. For the first eight performances, Donato Renzetti, the Italian conductor will make his British debut. Stephen Barlow will conduct the rest. (Photographs: Brian

Heseltine comes to the defence of a gate

The emergence of Mr James Callaghan, the former Prime Minister, as the leading opponent of Labour's defence policy has meant a serious loss of publicity for Mr Michael Heseltine, the former future Prime Minister.

Being the Secretary for Defence, he had reasonable expectations of fulfilling this role. In the circumstances, was he doing all right?

I went in search of him yesterday to Healey, his constituency. "Vittorio and Christian", proclaimed the sign opposite the railway station. That seemed a rather receiving slogar to employ excessive slogan to employ even on behalf of an ego the size of Mr Heseltine's.

I traced Mr Heseltine to the village of Watlington, where he was living quietly as a parttime seller of council houses. The Secretary for Defence started this business when a civilian, being once employed as Secretary for the Environ-

Yesterday he was about to tour a council estate. Apart from soliciting votes, his purpose was to urge those who had not bought their homes to do so, and to congratulate those who had.

The famous politician emerged from the head-quarters of the Watting Conservatives - a fine figure of a suit. He was giving a press conference in Wattington later that day to mark the fourth anniversary of the Conserva-tive council sales policy. We sped to Park View. To

Mr Heseltine's satisfaction, embourgeoisification was rag-ing there. "Do you own this?" was his question at every door. "You do? Good. That's what I like to hear . . . counter-revolution seemes to be going well.

From across the road came the sound of a woman with a North-eastern accent addressing Mr Heseltine volubly. She was complaining about her gate. Furthermore, she had no plans to buy her council house. In addition, since she moved here from Consett three years ago she had found the people less "sociable". Mr Heseltine was facing his first test of the day.

She was constructing her plight with the repairs recently done to the house opposite. "They did not have to pay". She beckoned Mr Heseltine into the house. "I see nothing wrong with the gate", he turned and muttered to us as

she led him in. Some negotiations appeared to ensue between her and the man who, as Secretary for the Environment, was presumably in charge of the nation's

publicly owned gates. Straining to hear, I could not understand the point at issue - being in any case, unfamiliar with this muni-ficent world in which, if your gate went wrong, you did not necessarily have to pay for it.

On and on the discussion went. "What's wrong with the bloody gate", I regret I irritably asked the woman. hoping to cut through to the heart of the issue. "What's wrong with it", she thundered. Whereupon, from her hall-

way, she produced another gate, a battered and broken one. The excellent gate through which we had passed was, it seemed, the wrong gate. It had broken.

The gate which we at first saw had been constructed by her husband at his own expense. She was demanding compensation. Mr Heseltine applied his mind to the problem. There was talk of a special grant.

"I don't say it applies to that gate, but there is a provision for compensation", he said. "But they've got a perfectly good gate", I remonstrated. "No. no. That's the wrong gate", Mr Heseltine explained to me.

The minister is a man who does not like to hear, or be the bearer of bad news. And he left clearly not satisfied that he had resolved the problem.

On reflection, it seemed a good world in which a magnifico such as the British Secretary for Defence can suddenly become involved in intractable negotiations with an intransigent voter over a council house gate.

In the garden

There is not much that can be done to counteract the effects of the exceedingly wet April and May. The rains will have washed plant food down into the soil below the reach of many shallow rooted plants, so be generous with fertilizers on the lawn and all parts of the garden.

The papers

The Daily Mail asks what useful results can come from the meeting of Western leaders at Williamsburg There is not much point in the leaders going there to lecture each other, but what they can do is to reaffirm their resolve to eschew begger-my-neighbour policies to protect their home industries. Otherwise there is a real danger that their short-sighted nationalist economic policies could snuff out world There is not much point in the

removery.

Mrs Thatcher will not predict when unemployment will start to fail, consistent with her belief that it has nothing to do with her, says the Daily Mirrer. "But Norman, Nigel, Geoffrey and Keith are making promises, even if they are not all singing exactly the same song."
